

DISKPLAY™
COLDSTORE DISK PLAYER

Direct surveillance video playback on your PC from COLDSTORE removable disks

COLDSTORE enables immediate bulk-seizure of video surveillance data in portable form for easy playback via DISKPLAY

Enables direct video review on PC directly from extracted COLDSTORE disks

Built-in playback software on COLDSTORE disks*

Specifically designed for the award-winning COLDSTORE storage system

Disk-docking station to suit COLDSTORE disk cradles

Simple USB connection to PC

Heavy-duty construction suitable for review workstations

*If supported by the specific video management system (VMS)

TECHNICAL SPECIFICATION

DISKPLAY™

MEDIA	
Hard disk	3.5" SATA drive of any capacity.
POWER	
Unit power	10 watts (typical)
Power supply	12V DC (supply included)
SOFTWARE	
Compatible O.S.	Windows 7 or later
Playback software	Pre-loaded playback software on each disk (if supported by selected VMS)
PHYSICAL/ENVIRONMENTAL	
Interface	USB 2.0
Dimensions	L 200mm W 188mm H 200mm (without mounting plate)
Weight	100g [3.5oz]
Operating temperature	0°C to 50°C [32°F to 122°F]
Relative humidity	Up to 85%, non-condensing
Compliance	FCC, CE, RoHS
PRODUCT CODES	
CS-DP-UK	DISKPLAY USB docking station for CS disks (UK power supply)
CS-DP-EU	DISKPLAY USB docking station for CS disks (EU power supply)
CS-DP-US	DISKPLAY USB docking station for CS disks (US power supply)

COLDSTORE Disks

Each disk recorded by a COLDSTORE surveillance storage array contains a specific segment of time, with a known start time & date and a known end time and date. Thus it is possible to physically locate any specific time span of recorded video in a COLDSTORE system and remove the disk for evidential purposes. It is therefore ideal for rapid bulk seizure of data and evidential transport.

DISKPLAY Playback System

DISKPLAY is a convenient solution for playback of COLDSTORE disks. It is a USB docking station designed specifically for accepting COLDSTORE disk cradles. This allows extracted disks to be played without having to remove the disk from the standard disk cradle. Thus DISKPLAY exploits the unique removable, playable disk feature of the COLDSTORE system.

Built-in Player Files

All COLDSTORE disks have the ability to be automatically pre-loaded with playback software specific to the video management system in use (if this is supported by the VMS). This software can be installed on any PC for playback. Thus each disk can be a stand-alone, playable media volume which has very high-capacity and is evidentially robust, containing the original recorded data.
